

TIMING IS CRUCIAL!

**THE RIGHT AMOUNT AT THE RIGHT
TIME WILL SAVE YOUR SOYBEANS**

PROTECT YOUR INVESTMENT

70% of eggs are laid in the spring but will hatch in the fall. Destroy slugs and snails with an application after the first fall rains (2-4 inches). By controlling the fall emergence you decrease the slug and snail population AND DAMAGE to your crop throughout the rest of the year.

SLUGGER ULTRA 4.0

Smaller particle size, 4% Metaldehyde, wheat based and coated.

Soybeans = 10 lbs./acre

SLUGGER 4.0

A non-coated, rainfast wheat based pellet w/4% Metaldehyde and proprietary attractant.
