

Protect From Sunburn & Improve Tree Health

- OASIS is a flowable micronized dispersion of calcium carbonate
- Softens the intensity of light creating cooler temperatures on the surface
- Improves photosynthetic efficiency and reduces water stress
- 1 gal of OASIS is equal to 20lbs of Surround
- Packaged in 4 gal jugs and 220 gal totes
- Organic formulation available

Unlike traditional kaolin clay, OASIS allows the transmission of light, but softens the intensity of it. Protecting from sunburn, but promoting photosynthesis.
